Wish you could look years younger and totally refreshed? You can—in an instant! “Just knowing which shades, formulations and makeup techniques to use can take ten years off your face!” promises makeup artist Berta Camal. Here’s how to . . .

Want full, young-looking lips? Shy away from bold colors or matte textures. “They’ll make your lips look smaller and highlight imperfections,” says Camal. “Instead, layer a softer shade over lip balm for a flattering hint of color and supple texture!”
